Yellow warning
Ice & Fog

Between
17:00 Mon 12 Dec 2022 and
10:00 Tue 13 Dec 2022

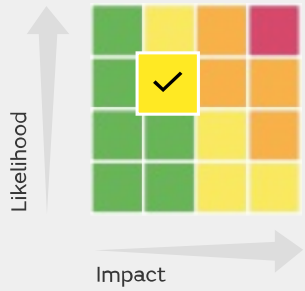
Areas of freezing fog and patchy ice on untreated surfaces may cause some difficult travel conditions on Monday night and Tuesday morning

What to expect

- Some injuries from slips and falls on icy surfaces
- Probably some icy patches on some untreated roads, pavements and cycle paths
- Slower journey times with delays to bus and train services possible, as well as a chance of delays or cancellations to flights

Further details

Freezing fog is expected to become more extensive overnight and could produce significantly reduced visibility to 50-100 metres at times. This may also lead to some patchy ice forming on untreated surfaces. Although fog may be less widespread in Antrim and Down, a few showers are likely to move inland overnight leading to some icy stretches, particularly on untreated surfaces. Fog is expected to clear through Tuesday morning.



Medium likelihood of low impacts

Issued at 14:08 Mon 12 Dec, 2022
